

XM Radio is awesome. i get to listen to music that I like that Radio Stations that are here in Nebraska can't Play. I do still listen to regular FM radio when i can not listen to XM. XM broadcasts music the way that it should be heard, Loud and Un-editied. One feature that I like about XM is that i can always view Artitst and track name so that way if I like their music I can follow up on them and possibly by their CD if the rest of their music is good.
